

MARYLAND HISTORICAL TRUST CONTINUATION SHEET
U.S. 301 SOUTH CORRIDOR TRANSPORTATION STUDY

Property Name: Pyles Lumber Warehouse and
Dwelling House
Survey No.: PG: 76A-8 (PACS A182)

Property Address 6210 and 6208 Old Branch Avenue, Camp Springs, Prince George's County
Owner Name/Address Henry and Mary Jenkins, 8604 Old Branch Avenue, Clinton, MD 20735
Year Built 1912/c. 1920

Description:

The Pyles Lumber Warehouse and Dwelling House were previously surveyed by the Maryland-National Capital Park and Planning Commission (M-NCPPC) in 1973 and 1984. Since the time of the previous survey, the dwelling house at 6208 Old Branch Avenue has been demolished.

National Register Evaluation:

Pyles Lumber Warehouse and Dwelling House is not eligible for the National Register of Historic Places. The property is not eligible under Criterion A, as research conducted indicates no association with any historic events or trends significant in the development of national, state or local history. Historic research indicates that the property has no association with persons who have made specific contributions to history, and therefore, it does not meet Criterion B. The property does not meet Criterion C, as the dwelling house has been demolished. In addition, the setting of the crossroads has been drastically altered by modern development and expansion of the highway system. As a result, the site integrity of the warehouse has been significantly compromised. Finally, the property has no known potential to yield important information, and therefore, is not eligible under Criterion D.

MHT CONCURRENCE:

Eligibility ☐ recommended ☒ not recommended

Criteria ☐ A ☐ B ☐ C ☐ D Considerations ☐ A ☐ B ☐ C ☐ D ☐ E ☐ F ☐ G ☐ None

Comments: We agree that this property is not eligible; however, was it eligible before the dwelling was demolished? It would appear not. Neither is there any discussion of the warehouse, which does remain, as a type or of its integrity.

PRINCE GEORGE'S COUNTY
HISTORIC SITE SUMMARY SHEET

Survey #: P.G. #76A-8 Building Date: ca. 1912, ca. 1930.

Building Name: Pyles Lumber Warehouse and Dwelling House

Location: 6210 and 6208 Old Branch Avenue, Camp Springs, Maryland

Private/Storage/Occupied/Good-Fair

Description:

There are two buildings at this crossroads site. The first is the Pyles dwelling house, a two-story gable-roofed frame house on the two-acre northeast corner of the crossroads. Entrance is in the central bay of the five-bay west (main) facade. A one-story columned porch shelters the west facade and wraps around the north gable end. At the south gable end is a two-story semi-hexagonal bay window. On both stories, double doors have been installed in place of the windows, to allow easy access for storage of large business materials. The frame siding of the house has been covered by imitation red-brick asphalt shingle.

The second building stands across Allentown Road on the 1.59-acre southeast corner lot. It is a rectangular two-story frame warehouse with a nearly-flat roof which slopes gently to the east; its principal facade faces Old Branch Avenue (to the west). This main west facade has a large central double-door on each story. On the second story this double-door is flanked by two small 2/2 windows. The original white German siding has recently been covered by vertical natural-color (wood composite?) siding.

Significance:

These two buildings represent the residence and commercial structures of the Pyles family business, at an important crossroads location; the intersection of the Washington-Brandywine Road and the Camp Springs - Upper Marlboro Road had been the site of commercial enterprises since before the Civil War. The dwelling house on the northeast corner lot was built by W. E. Pyles ca. 1912, while Pyles operated a grocery store on the southeast corner. In later years, probably before 1930, Pyles constructed the frame feed-warehouse just south of the grocery store. After the Second World War, when he went into the lumber business, the warehouse came to be used for lumber storage; it serves that purpose today.

This important commercial crossroads has changed drastically in the last generation, particularly with the construction of Maryland Route 5 a short distance to the east. The 1.59-acre warehouse lot now contains several other commercial buildings of the Pyles Lumber Company. The two-acre dwelling house lot now includes two other residences and separate garages. The old frame dwelling house is boarded up and used as storage for the lumber company, and future plans for improvement of the Route 5 interchange include use of this house lot as an access ramp.

<input checked="" type="checkbox"/> fair	<input type="checkbox"/> unexposed		

Prepare both a summary paragraph and a general description of the resource and its various elements as it exists today.

There are two buildings at this crossroads site. The first is the dwelling house of W. E. Pyles, built at approximately the time that he established his business here. This is a two-story gable-roofed frame house built on the two-acre northeast corner of the crossroads. Entrance is in the central bay of the five-bay west (main) facade. The door has transom and sidelights. Above this central bay is a central gable in the roof, which has a small square window and fish-scale shingles as do the north and south gable ends. A one-story columned porch shelters the west facade and wraps around to shelter the north gable end as well.

The main part of the house consists of central hall and two parlors with bedrooms above. Two interior corbelled-cap brick chimneys at the ridge serve flues on the interior walls of these two parlors. Each of these pseudo-fireplaces has a heavy dark-wood veneered mantel.

At the south gable end is a two-story semi-hexagonal bay window. On both stories, double doors have been installed in place of the windows, to allow easy access for storage of large business materials.

To the east is a two-story ell-shaped wing which is taken up by the kitchen, back stairs, and bedroom above. Beaded wainscoting of the period covers the walls and ceiling of the kitchen. There is another corbelled-cap brick chimney at the ridge at the east end of this ell.

The frame siding of the house has been covered by imitation red-brick asphalt shingles.

.....

The second building stands across Allentown Road on the 1.59 acre southeast corner lot. It is a rectangular two-story frame warehouse with a nearly-flat roof which slopes gently to the east; its principal facade faces Old Branch Avenue (to the west). This main west facade has a large central double-door on each story. On the second story this double-door is flanked by two small 2/2 windows. The original white German siding has recently been covered by vertical natural-color (wood composite?) siding.

check: Applicable Criteria: ☐ A ☐ B ☐ C ☐ D
and/or

Applicable Exception: ☐ A ☐ B ☐ C ☐ D ☐ E ☐ F ☐ G

Level of Significance: ☐ national ☐ state ☐ local

Prepare both a summary paragraph of significance and a general statement of history and support.

The dwelling house, built, ca. 1912, was the residence of W. E. Pyles, who had, a few years earlier, started a grocery business in a building across the road to the south. This was an important crossroads, the intersection of the Washington-Brandywine Road and the Camp Springs - Upper Marlboro Road, and there had been commercial enterprises at this crossroads since before the Civil War.

In later years, probably before 1930, Pyles constructed a feed warehouse just south of the grocery store, with its two double-doors facing the Brandywine Road. When, after the Second World War, Pyles went into the lumber business, this frame warehouse came to be used for lumber storage. It still serves that purpose.

Although this intersection has been an important commercial crossroads for over a century, it has changed drastically in the last generation, particularly with the construction of Maryland Route 5 a short distance to the east. The northwest and southwest corners are now taken up with gas stations, and traffic is very heavy. The 1.59 acre warehouse lot now contains several other commercial buildings of the Pyles Lumber Company. The two-acre dwelling house lot now includes two other residences and separate garages. The old frame house is boarded up and used as storage for the lumber company, and future plans for improvement of the Maryland Route 5 interchange include use of this house lot as an access ramp.

DESCRIBE THE PRESENT AND ORIGINAL (IF KNOWN) PHYSICAL APPEARANCE

There are two separate buildings here. The first is located on the NE corner. It is a rectangular-shaped, two-story frame house, with a newer brick veneer. It has five bays on its main (west) facade, and there is a central door and a center gable in the roof. The center gable and end gables are covered with patterned shingles. The door has transom and side-lights; a heavy, open porch surrounds the front and north sides.

South of this, just below the SE corner of the crossroads, is an older, two-story frame building with a flat roof. The main (west) facade has large doors at each level, and a crane extends over the second-story door. This was probably the original warehouse for the Pyles Lumber Co., which is still in operation here.
